

Life Members support SAMSAT Intern R&D

The first group of students participating in the SAMSAT Intern R&D project graduated May 3, 2025 at the AREA 21® in the Boeing Center at Tech Port. The teams presented their projects which will be exhibits in the museum and were presented with certificates at the ceremony.

San Antonio Museum of Science and Technology, SAMSAT, applied for and received U.S. National Science Foundation, NSF, [Award 2417095](#): Intern Research and Development at the Science Center: Exploring Roles and Learning as Students and Mentors Build High-Tech Exhibits. The Science Center is managing the projects and four of the local San Antonio Universities, UTSA, TAMU-San Antonio, St. Mary's and Trinity are participating with teams of 5 undergraduate student interns, Faculty advisors and mentors provided through **the IEEE Lone Star Section Life Members Affinity Group**. The projects kicked off January 27 and will run through April for the first year of the 3-year project. The undergraduate students are the project focus.
